Dear Hugh

Hope that you are both well and have had some holiday.

Just catching up after being away myself and I attach the overdue summary report for June.

I will forward the report for July in due course – I am expecting at least one report from a gamekeeper but otherwise nothing was reported for last month.

All the best,

Colin

RE: PAW Executive meeting - o/s actions

Thanks Karen,

Interference with traps and snares

BASC was commissioned by Scottish Government to collate reports of interference (damage, vandalism, release of decoys etc.) to traps and snares in Scotland. A press release was issued in February 2014 and partner organisations agreed to highlight this study to their own members. The study commenced in April 2014 (though some reports of interference before this date were received) and will end at the end of March 2015.

To date, a total of 27 reports of interference have been submitted to BASC. These reports cover interference with over 94 individual traps or snares – many reports refer to more than one trap or snare being interfered with at any one time. Most of the reports refer to interference that took place between March and June, with only three reports having been received after June. This could reflect the seasonal pattern of trapping or snaring or a fall-off in reporting following the initial publicity.

A full analysis of these reports of interference, and retrospective reports received up to the end of March, will be made. This will include trap or snare type, geographical location, the nature of the interference and whether or not the interference was reported to Police Scotland. This report will be made to Scottish Government.

Hope that this is what you were after.

Yours,

Colin

Natural Resources Division
Environment and Forestry Directorate
The Scottish Government

Interference with Traps & Snakes
8 (b) ACTION - [REDACTED] to raise at next WCLO meeting
SG are going to fund a brief study to establish the extent of this problem. BASC will collate incident logs and report on these monthly to SG. Organisations should remind their members that all crimes should always be reported to Police Scotland, not just to BASC.
Further discussion around this topic centered round possible guidance on releasing non target species (e.g. song birds in the breeding season) so it was agreed that this would be suggested to the PAW Legislation Group to consider. It was also suggested that the iphone app could be developed for this.

Many thanks as always,
Karen

I will need this by cop **Monday 16th Feb** (apologies for the short notice but a brief note will suffice – war and peace definitely not required!).
Would you be able to give me a brief note in writing that I can read out at the meeting about the progress of the study? Could we also have something which covers when the study is ending and what you are intending on doing with your final report which I assume will come to us?
I know you don't attend the PAW Exec but please see the action below (which actually covers several points) about the BASC traps study.

From: [REDACTED]
Sent: 19 February 2014 10:00
To: [REDACTED]
Subject: BASC Scotland instigates study to monitor illegal trap and snare interference. Press release.

The following press release has been sent to shooting and farming press, agricultural correspondents and newspapers in Scotland.

BASC Scotland instigates study to monitor illegal trap and snare interference

19th February 2014.....immediate release

Land managers in Scotland have agreed on a year-long study, instigated by the UK's largest shooting organisation, the British Association for Shooting and Conservation (BASC), to analyse the extent of unauthorised interference with legal traps and snares.

The study will use trap and snare interference reports collected from BASC members and members of other land management organisations to supply a monthly analysis to the Scottish Government and to the Partnership for Action against Wildlife Crime (PAWW Scotland).

The use of traps and snares to assist with the management of certain pest species of bird and mammal, such as crows, rats and foxes, is tightly controlled by legislation in Scotland. Depending on the tool used, operators now have to be trained and traps and snares tagged so that the user can be identified.

Despite this level of control there are a number of reports of legal traps and snares being tampered with, moved and vandalised. Such actions are illegal and not only reduce the efficiency of pest control but can also compromise animal welfare, especially if traps or snares are moved and cannot be checked at regular intervals.

At a recent meeting of the Rural Affairs, Climate Change and Environment Committee the Minister, Paul Wheelhouse MSP said: "We do not have statistical evidence of the issue; we have only anecdotal evidence and suggestions from people that that might happen. Hopefully, the work that BASC will do, with Government support, will help to define how big the problem is, if, indeed, it is a problem at all."

Mike Holliday, Chairman of BASC Scotland's Gamekeeping and Wildlife Management Working Group said: "This appears to be a widespread problem that can affect the welfare of birds and animals as well as the work of gamekeepers and land managers. A well-set trap or snare will target pest species and restrain them until they can be humanely despatched – a vandalised one could catch or harm protected species."

Tim Baynes, Director of Scottish Land & Estates Moorland Group agreed: "Unfortunately we have had reports of trap and snare vandalism from nearly all moorland areas in Scotland, no matter how remote."

Alex Hogg, Chairman of the Scottish Gamekeepers Association said: "Even in a relatively remote part of the Borders I have had a number of traps vandalised or removed. I can only imagine that the problem is worse in more populated areas."

As with any other suspected crime, if land managers come across vandalised, damaged or moved traps or snares they are advised to report this to Police Scotland and then record the incident with BASC Scotland via trapsandsnares@basc.org.uk.

ENDS

Notes to editors: The organisations supporting the BASC and Scottish Government initiative are: Scottish Land & Estates, Scottish Gamekeepers Association, Game and Wildlife Conservation Trust (Scotland), Scottish Countryside Alliance, Scottish Association for Country Sports and NFU Scotland.

PAWW Scotland is the Partnership for Action Against Wildlife Crime in Scotland. PAWW Scotland partners include a wide range of bodies committed to tackling wildlife crime including conservation, land management, shooting and law enforcement organisations. PAWW Scotland defines wildlife crime as any unlawful act or omission, which affects any wild creature, plant or habitat, in Scotland. More information at www.PAWWScotland.gov.uk
